

WHY ANTITRUST?

Join the Antitrust Law Section for a week of panel discussions featuring experienced antitrust, consumer protection, and privacy attorneys and economists who will reflect on how they got started, key lessons along the way, and what it takes to be a successful practitioner in these fields. This programming typically travels to your law schools, but this summer, we're bringing the programming directly to you during your summer associate and intern programs. These panels are geared towards law and economics students and junior associates who are interested in hearing about the types of careers and opportunities available in antitrust, consumer protection, and privacy.

MARK YOUR CALENDARS!
